## **Notes to the financial statements**

### **For the three-month period ended March 31, 2010 (unaudited)**

---

#### **1. NATURE OF ACTIVITIES**

The Company was incorporated under the *Canada Business Corporations Act* to purchase, explore, develop, and eventually operate mining properties.

The Company is in the process of exploring its mining property interests and has not yet determined whether its mining property interests contain mineral deposits that are economically recoverable.

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and on the basis on the going concern assumption, meaning the Company will be able to realize its assets and discharge its liabilities in the normal course of operations.

#### **2. ACCOUNTING POLICIES**

The unaudited interim financial statements must be read in conjunction with the financial statements for the year ended December 31, 2009. They have been prepared in accordance with Canadian generally accepted accounting principles, using the same accounting policies as outlined in Note 3 of the financial statements for the year ended December 31, 2009.

In February 2008, Canada's Accounting Standards Board ('AcSB') confirmed January 1, 2011 as the changeover date to move financial reporting for Canadian publicly accountable enterprises to the International Financial Reporting Standards ('IFRS'). The Company followed the key events timeline proposed by the AcSB to obtain training and thorough knowledge of IFRS, finalize assessment of accounting policies with reference to IFRS and plan convergence to be ready for the changeover planned in 2011.

#### **3. INVESTMENTS**

##### Short term

As of March 31, 2010, short term investments include term deposits totalling \$1,360,822. From this amount, \$201,951 is maturing in 2011 but is cashable at any time and the balance of \$1,158,871 is maturing between June 6, 2010 and February 7, 2011. These investments bear interest at annual rates of 1% to 1.75%.

##### Long term

As of March 31, 2010, long term investments include guaranteed investment certificates and others investments from canadian financial institutions totalling \$1,248,698 maturing between June 6, 2011 and June 3, 2013 and bearing interest at annual rates of 1.25% to 3.85%.

#### *Options*

The Company has established a stock option plan (“the plan”) whereby the Board of Directors may from time to time grant options to purchase common shares to employees, officers, directors and consultants, for such terms and at such exercise prices as may be determined by the Board.

The plan provides that the maximum number of common shares in the capital of the Company that may be reserved for issuance under the stock option plan is equal to 6,600,000 and that the maximum number of common shares which may be reserved for issuance to any one optionee may not exceed 5% of the common shares outstanding at the date of grant. These options may be exercised for a period of 5 years after the grant date. The options granted vest in stages over a period of 18 months after the grant date, at the rate of 15% per quarter, at the exception of 10%, which may be exercised from the date of the grant. For the options granted to a consultant, it vests in stages over a period of 12 months after the grant, at the rate of 25 % per quarter.

The option’s exercise price is established by the Board of Directors and may not be lower than the market price of the common shares at the time of grant.

On March 22, 2010, the Company granted a total of 980,000 stock options that may be exercised over a period of five years, at an exercise price of \$0.34 and having a fair value of \$0.26. These options have been granted to employers, directors and officers.

The fair value of these options was estimated using the Black Scholes stock option evaluation model with the following assumptions: estimated average duration of 5 years for these options, risk free interest rate of 1.5%, forecast volatility of 101% and no forecast dividend.

Variation in outstanding options since the beginning of year is as follows:

#### **9. FINANCIAL INSTRUMENTS**

##### **Objectives and politics concerning financial risks management**

The Company is exposed to different financial risks resulting from both its operations and investing activities. The management of the financial risks is done by the management of the Company.

The Company does not conclude agreements for financial instruments including financial derivatives for speculation purpose.

##### **Financial risks**

The principal financial risks to which the Company is exposed as well as its politic concerning the management of the financial risks are detailed as follow:

##### **Interest rate risk**

Investments and the account payable to a mining company are at fixed rates and therefore expose the Company to risk of fair value variation due to interest rate variation. Interest 1% higher would have decreased the fair value of these by \$26,000 as at March 31, 2010. The other financial assets and liabilities of the Company does not represent interest risk because they are conclude without interest. The Company does not use financial derivatives to decrease its exposure to interest risk.

##### **Liquidity risk**

The management objective is to maintain sufficient cash to ensure that the Company has at its disposal sufficient sources of financing such as private financing. The Company also establishes budget and liquidity forecasts to ensure that it has to its disposal sufficient funds to meet its financial obligations. Obtaining additional funds make it possible to the Company to continue its operations and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

##### **Credit risk**

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Generally, the maximum credit risk is equivalent to the carrying value of financial assets exposed to credit risk, less any impairment. The Company is subject to credit risk through cash and investments. The Company reduces its credit risk by maintaining its cash and an important part of investments in financial instruments guaranteed by and held by a Canadian chartered bank but the Company is subject to concentration of credit risk. The Company aims at signing partnership agreements with established companies and follows closely their cash position to reduce its credit risk on accounts receivable.

##### **Market risk related to listed shares**

The listed shares held by the Company are exclusively shares from an emerging an issuer acting in the mineral exploration area. The Company is exposed to market risk in trading its shares and unfavorable market conditions could result in the disposal of its listed shares at less than its value as at March 31, 2010. As at March 31, 2010, the value of these listed shares is \$22,612 with an original cost of \$104,417. A 10% variation in the closing price on the stock market would result in an estimated variation of \$2,200 of the loss at the end of March 2010.
